27792000

27798000

Maße möglichst dem
Fliesenraster anpassen.

Die der Brause beige packte Siebdichtung muss eingebaut werden, um Schmutzeinspülungen aus dem Leitungsnetz zu vermeiden. Schmutzeinspülungen können die Funktion beeinträchtigen und/oder zu Beschädigungen an Funktionsteilen der Brause führen, für hieraus ergebende Schäden haftet Hansgrohe nicht.

Hansgrohe Brausen können in Verbindung mit hydraulisch und thermisch gesteuerten Durchlauferhitzern eingesetzt werden, wenn der Fließdruck vor der Armatur mindestens 0,15 MPa beträgt.

Adapter si possible, les mesures à la dimension des carreaux.

Le joint à filtre fourni avec la pomme de douche à main doit être installé afin de retenir des impuretés du système de conduites. Ceux-ci pourraient influencer le fonctionnement de ce produit et même endommager des pièces mobiles. Des réclamations à la suite de l'usage de la pomme de douche sans joint-tamis de hansgrohe ne peuvent pas faire partie de notre garantie.

Les douchettes de Hansgrohe peuvent être utilisées en liaison avec des chauffe-eau hydrauliques et à commande thermique, lorsque la pression présente en amont de la robinetterie est d'au moins 0,15 MPa

27798000

Adjust the dimensions to the tile pattern if required.

The mesh washer must be insert to protect the overhead shower against incoming dirt by pipework. Incoming dirt leads to defects or/and can damage parts of the shower; such caused faults voids all liability and guarantee claims.

Hansgrohe showers can be used together with hydraulically and thermally controlled continuous flow heaters if the flow pressure is at least 0,15 MPa before the shower fitting.

Adattare le misure alla
dimensione delle
piastrelle.

Per proteggere la soffione doccia da eventuali impurità provenienti dalle tubazioni dell'acqua, deve essere inserito il filtro nell'impugnatura della doccia stessa. Tali impurità possono infatti causare difetti e/o danneggiare parti della doccia; in questo caso la Hansgrohe non risponde dei danni.

Le doccette Hansgrohe possono essere utilizzate in funzione di scaldabagni idraulici e termici, se la pressione di flusso davanti alla rubinetteria è di almeno 0,15 MPa.

Adaptar las medidas al retículo de los azulejos.

La junta de filtración que se suministra con la ducha mural evita que las partículas de suciedad procedentes de las tuberías lleguen a la ducha mural. Debe colocarse entre el flexo y la ducha mural. Infiltraciones de suciedad deterioran el funcionamiento de la ducha mural y pueden causar daños en el interior de la misma que no están cubiertas por la garantía de Hansgrohe.

Las duchas mural de Hansgrohe se pueden utilizar en combinación con calentadores instantáneos con control hidráulico o térmico siempre que la presión dinámica del agua supere los 0,15 MPa.

27798000

При определении внешних размеров при монтаже старайтесь по возможности учитывать расположение кафельной плитки.

Для предотвращения попадания частиц грязи из водопроводной сети необходимо установить фильтр, прилагаемый к ручному душу. Частицы грязи могут нарушить отдельные функции и/или привести к повреждению функциональных деталей ручного душа. Hansgrohe не несет ответственность за повреждения вследствие отсутствия фильтра.

Души Hansgrohe можно использовать с проточными водонагревателями с гидравлическим и термическим управлением, если напор воды в зоне до арматуры составляет не менее 0,15 МПа.

Prilagodite meru što je više moguće rasteru pločica.

Obavezno ugradite mrežicu (A) upakovanu s tušem, čime sprečavate ulazak prljavštine iz vodovoda. Prljavština može dovesti do delimičnog ili potpunog oštećenja delova tuša. Za eventualna oštećenja uzrokovana prljavštinom proizvođač Hansgrohe nije odgovoran.

Hansgrohe tuševi se mogu koristiti u kombinaciji s hidraulički i termički kontrolisanim protočnim bojlerima ukoliko pritisak iznosi najmanje 0,15 MPa.

Hvis det er mulig
tilpasses mål til
fliseraster.

Silpakningen som er levert med dusjen skal bygges inn for å forhindre at smuss spyles inn fra ledningsnett. Innspylt smuss kan påvirke funksjonen negativt og/eller kan medføre skader på hånddusjens funksjonsdeler. Hansgrohe påtar seg inget ansvar for skader som resulteres av dette.

Armaturer fra Hansgrohe kan brukes sammen med hydraulisk og termisk strypte gjennomstrømningsovner når gjennomstrømningsstrykket før armaturen er på minst 0,15 MPa.

Изравнете по
възможност към
растера на плочките.

Опакованото заедно с разпръсквателя уплътнение с цедка трябва да се монтира, за да се избегне натрупване на замърсявания от водопроводната мрежа. Натрупването на замърсявания може да наруши функцията и/или да доведе до увреждания на функционалните части на разпръсквателя, Hansgrohe не носи отговорност за получените се по този начин щети.

Разпръсквателите на Hansgrohe могат да се използват във връзка с хидравлично и термично управляеми проточни нагреватели, ако хидравличното налягане на арматурата е минимум 0,15 МПа.
