**Hinweis:**

Bei der Montage von Mineralgusswannen muss gewährleistet sein, dass alle 60 cm ein tragender Auflagepunkt für den Montagerahmen vorhanden ist. Duschwannen mit nicht tragenden Verrippungen sind nicht geeignet. Die Duschwanne muss vom Hersteller für die Montage mit Wannenfüßen freigegeben sein.

Der Versatz des Montagerahmens bei einem Hindernis an der Wandseite, ist nur bei Duschwannen mit vollflächigem/geschlossenen Untergrund möglich (siehe Seite 21).

Der Montagerahmen ist ausgelegt für Duschwannen, deren Ebenheit der Wannenunterseite eine Abweichung von 3 mm nicht überschreitet.

**Note:**

When installing mineral cast trays, ensure that there are sufficient load bearing points at distances of 60 cm from each other for the installation frame. Shower trays with non-load bearing ribs are not suitable. The shower tray must be approved by the manufacturer for installation with bathtub feet.

The retraction of the mounting frame in the event of an obstacle on the wall side is only possible for shower trays with full-surface (see page 21).

The mounting frame is designed for shower trays where the top edge and/or the bottom edge do not deviate by more than 3 mm from the horizontal plane.
