THE SOURCE OF LIVING

Water is used for drinking and cooking all over the world. We use running water in the kitchen around 100 times every day! We take it so much for granted that we often don't think of water when we hear the word kitchen. We forget what has to work hardest in the kitchen: the kitchen tap. An appliance that is used this frequently must naturally be durable and function perfect every day. In addition, since kitchens are increasingly becoming living spaces, it also has to look great. That is why ergonomics, functionality, aesthetics and finishes are so important in GROHE kitchen taps. In short, this is why we refer to GROHE in the kitchen as [The Source of Living](#).

THE SOURCE OF ENJOYMENT

GROHE delivers top-quality drinking water directly from the tap - from refreshingly cold to kettle hot. They look great, offer amazing convenience, and come with GROHE Light Technology which the specially manufactured brass alloy contains far lower lead content than most legal requirements. GROHE helps you enjoy water any way you want it.

THE SOURCE OF TECHNOLOGY

High-quality materials, outstanding design and innovative technologies ensure that your GROHE tap will last a lifetime. Our tap levers feature GROHE SilkMove® technology, making them extremely easy and precise to operate. Many different designs and spout heights give you huge scope when choosing your kitchen furniture and sink.

THE SOURCE OF STYLE

Our full range of modern 'cosmopolitan', timeless 'contemporary', and simply 'authentic' style taps offers you exactly the right tap to match your needs and your taste, to enable your kitchen tap to stay looking as good as the day it was installed GROHE StarLight® chrome resists scratches and ensures a lifelong shiny finish.

THE SOURCE OF CONVENIENCE

Many of our models are available with pull-out mousseurs and sprays, a convenient and time-saving feature, either for rinsing salads, vegetables or for washing greasy pans. You will be amazed at the adaptability and flexibility of our range of professional sprays - to help make your life in the kitchen as easy as possible.

MASTERS OF TECHNOLOGY

GROHE's people have been regarded by their peers in the industry as Masters of Technology, because of their innovations, outstanding design and awardwinning fittings.

By a combination of their advanced craftsmanship and their cutting-edge approach to effective teamwork and processes, our Masters of Technology take the lead in developing, designing and manufacturing our outstanding product range, all the while testing and fine-tuning each piece to ensure continued customer satisfaction.

The result: Timeless design. And quality that lasts a life-time. Again and again GROHE products surprise users with unique features that provide 'Pure Freude an Wasser'. When you use a GROHE product you can feel the difference. Time after time.

THEOCHARIS LIOLIS

Master of Technology, produces unbeatable hardwearing tap surfaces with GROHE StarLight®.

TAP FEATURES

Accommodating your every wish and desire, GROHE water systems and kitchen taps include user-centric features and ingenious details that make all the difference. More choice, more comfort and flexibility; which is why our products are such a pleasure to use.

Lead+Nickel Free
No contact of water with lead and nickel due to isolated inner water ways.

ComfortHeight
Height of the spout allows easy filling of large pots.

SwivelStop
Limited turn angle prevents flooding.

EasyExchange
The aerator is easy to install and de-install using just a coin.

Pull-Out Mousseur
Increases the operating radius of your tap.

SpeedClean
Remove limescale with a single wipe.

SINK FEATURES

Spacious bowls
Designed for bowls deeper than 20cm, for an increased capacity and greater practicality in all operations.

Perimetric overflow
The new perimetric solution available on some models improves the look of the sink with its squared-out and essential shape.

Bowls with tight radius
These are bowls featuring a squared-out shape, a modern design and greater capacity. A small radius on the corner enhances the convenience of cleaning.

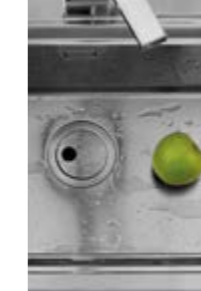

Fittings
All sinks are provided with fixing brackets, gasket, waste fitting, siphon and overflow.

Waste fitting with remote control
This convenient accessory saves you from wetting your hands when the bowl needs emptying.

Waste Fittings
Foster sinks are equipped with a generously sized 3.5" waste fitting and practical strainer plug that prevents solids from flowing away with the waste water.

Space waste fitting
The stainless steel stopper forms part of design. Further to this, it features a limited encumbrance, ensuring the best use of the under sink.

Sturdy sinks
Important thickness for long-lasting solutions. This icon marks the models with a steel thickness of 1mm.

Double tap hole
The ample tap area is already provided with two tap holes. The second hole can be used to install the control of the automatic waste fitting or a practical soap dispenser.

MINTA U SPOUT WITH MOUSSEUR

Minta — Convenient kitchen tap with pull-down spray head

This GROHE Minta kitchen tap will make light work of your kitchen chores. Its high U-shaped spout is ideal for filling tall pots and the 360° swivel range offers maximum flexibility. The pull-down spray head will reach into all corners of your basin without any difficulty, whether you're rinsing dishes, washing fruit or cleaning the basin.

The elegant lever handle benefits from **GROHE SilkMove®** technology for smooth operation and fingertip control, while **GROHE StarLight®** chrome guarantees a pristine finish for years to come.

IN-SET

S3000 1.5 AND 1.0

The S3000 is a sink featuring a large and deep bowl, suitable for additional kitchen accessories. The beautifully crafted squared design retains its sober elegance through the design and thickness of the metal.

The above-average 8mm steel thickness enhances its resilient technologies for durable useage. The perimetrical and soft recess area prevents any possible overflowing and guarantees the cleanliness of any worktop.

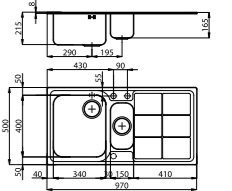

The S3000 is available in either a 1.0 and 1.5 sink option with a right hand bowl. The waste is ideally positioned towards the back of the bowl close to the wall to save space within the cabinet.

K7

Stylish and functional kitchen tap with side spray

Cooking will be much more than just a hobby for you with this GROHE kitchen tap. Developed with professional chefs, it will spark your passion for cooking. Apart from its attractive design, you'll come to love its functional perfection. One particularly convenient extra is its separate side spray with a powerful shower jet that allows you to clean tall pots or even the entire sink thanks to its extensive reach. This sink mixer also comes with a high swivel spout that is ideal for filling tall pots

GROHE StarLight® chrome lends an air of elegant modernity to the design. Ensuring compatibility with all styles of sink and kitchen layout, the range features a comprehensive choice of single-hole and two-hole mixers with or without an integrated spray. For added convenience, models with an independent hand-held spray are also available.

IN-SET

NEW WAVE 86

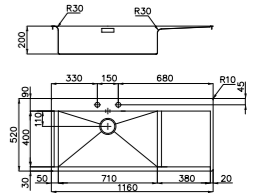

The Wave is a distinctive feature of the New Wave line. The elegant design breaks the minimalist rigour of the squared-out bowls and the flat drainer.

To maintain a luxurious finish, the AISI 304 stainless steel has been brushed with natural fibres, which maintain a bright finish.

The slanted edge on the right hand side bowl with a 3.5" drain size maximises the potential of the prevention of solids from flowing away with the waste water.

Clean lines, contemporary styling and enhanced practicality.

With its clean lines and contemporary styling, the Eurodisc Cosmo mixer combines practical features with smart looks, providing a host of benefits to your kitchen.

Finished in **GROHE StarLight®** chrome, the design is robust and functional, making light work of daily chores. Combined with a swivel spout, the fin-shaped lever can be operated using just two fingers- thanks to **GROHE SilkMove®** technology.

IN-SET

ELETTRA 1.5 AND 1.0

With a linear structure and capacious tanks, this sink highlights the smooth notions of the design throughout. Further equipped with a generously sized 3.5" waste drain fitting, the Elettra prevents solids from flowing away from the waste water.

The Elettra further combines the concept of functionality and practicality within its reversible solution. This is enhanced through the left or right hand options prior to fitting alongside the 1.0 and 1.5 sink option.

MOON 1.5 AND 1.0

The Moon sink features a brushed finish with AISI 304 (18/10) stainless steels. Thanks to the high percentages of chrome and nickel they contain, they give a particularly bright finish and are absolutely resistant to rust and corrosion. The perimetrical and soft recess area prevents any possible overflowing and guarantees the cleanliness of the worktop.

Moon also offers an alternative left or right hand fitting option for the spacious bowl, enhancing the possibilities of the sink with its reversible functionality. The Moon is available in either the 1.0 and 1.5 bowl option at your request.

	<p>Reversible Brushed Finish Cabinet Size: 600mm 1 bowl: 341 x 400 x 195mm H 1 bowl: 150 x 300 x 162mm H Dimensions: 970 x 500mm Cut-out: 950 x 480mm Basket Strainer Waste, 3.5"/90mm Ø Waste and Syphon Included</p>

KIND OF EDGE

Built-in and beyond

The methods with which worktops can be built-in have become increasingly varied and customised.

Foster is the first manufacturer to have researched and used the new recessing methods and has thus acquired a great deal of experience.

FT Flush-mount
The product is sunk in 1 mm deep recess thus being perfectly flush with the worktop. As an alternative, it can be installed on the worktop too.

SF Flat-edge
An original edge, with an inclined 3mm high profile featuring easy installation alongside an elegant design.

STD Standard
A traditional, built-in worktop with a vertical 8mm edge.

WARRANTY

GROHE products are designed to be both visionary and innovative with quality always guaranteed.

Purchasing GROHE products means your investment is perfectly balanced in terms of quality, technology and design with sustainable production.

High quality materials and the latest manufacturing methods combine with market-leading technologies to ensure reliable performance for many years. **This is reflected in our five-year warranty on all products that are manufactured under the brand.**

Our focus on providing excellence and peace of mind means should your product within the guarantee period require a repair or replacement.

We also offer a five year warranty on all Foster sinks which are purchased with GROHE taps.
